SUPER ANTIVIRUS

Harewaves *wireless*

inc

At Harewaves we are continuously working to improve our rural broadband service as well as adding additional products that you have asked us about. This newsletter contains some important information about those improvements.

Harewaves announces the completion of the Tower Road Transmission site

The completion of the Tower Road Transmission site marks a milestone in the service life of Harewaves. Andrew has worked hard to provide this new service offering for our customers in the

area north of Rocky. Look at our Expanded coverage map on our website. Please call us if you know of anyone who would be interested in this new service.

Harewaves is no longer the outlet for Sears

As of August 12, 2013 the new service depot for Sears will be at Savvy Selections. Harewaves will no longer provide this

service as it does not fit well with our business goals. We wish Savvy Selections all the best.

Announcement:

As of August 20, 2013 Neil Ratcliffe has left Harewaves to pursue other ventures. Please direct all of your technical questions to our office @ 403 746-0096 where experienced technicians will be happy to assist you. We wish Neil the best for the future.

Quip of the month

Theory is when you know something, but it doesn't work. Practice is when something works, but you don't know why it works. Programmers combine theory and practice : Nothing works and they don't know why.
